

Événements et Callbacks

(JavaScript)

```
var answer = null;  
while (answer === null) {  
    answer = callEmployer();  
}
```

Retourne une de ces valeurs :

- null
- false
- true

```
var myPhone = new Phone( '0601020304' );
```

```
var myPhone = new Phone('0601020304');
```

```
myPhone.on('callReceived'
```

```
);
```

```
var myPhone = new Phone('0601020304');
```

```
myPhone.on('callReceived'
```

```
);
```

Événement

```
var myPhone = new Phone('0601020304');  
myPhone.on('callReceived', function(answer) {  
  
});
```

```
var myPhone = new Phone('0601020304');  
myPhone.on('callReceived', function(answer) {  
  
  
  
  
  
  
});
```

Callback

```
var myPhone = new Phone('0601020304');

myPhone.on('callReceived', function(answer) {
  if (answer === true) {
    console.log("Je suis trop content !");
  } else {
    console.log("Oh non...");
  }
});
```

```
var myPhone = new Phone('0601020304');
```

```
myPhone.on('callReceived', function(answer) {  
    if (answer === true) {  
        console.log("Je suis trop content !");  
    } else {  
        console.log("Oh non...");  
    }  
});
```

```
var myPhone = new Phone('0601020304');

myPhone.on('callReceived', function(answer) {
  if (answer === true) {
    console.log("Je suis trop content !");
  } else {
    console.log("Oh non...");
  }
});
```

```
var myPhone = new Phone('0601020304');

myPhone.on('callReceived', function(answer) {
  if (answer === true) {
    console.log("Je suis trop content !");
  } else {
    console.log("Oh non...");
  }
});
```

```
var myPhone = new Phone('0601020304');

myPhone.on('callReceived', function(answer) {
  if (answer === true) {
    console.log("Je suis trop content !");
  } else {
    console.log("Oh non...");
  }
});
```

```
var myPhone = new Phone('0601020304');

myPhone.on('callReceived', function(answer) {
    if (answer === true) {
        console.log("Je suis trop content !");
    } else {
        console.log("Oh non...");
    }
});
```
